## RECENT EXPERIENCES

### www.gerontovida.org.ar

New website for the Gerontovida Civil Association. Developed using React, Redux, React-Router, React Bootstrap and React Chart for chart generation. It has also login session functionalities and a dashboard to publish, edit and delete articles and charts.

### api-docs.netlify.app/

This API handles different kind of writen content, for example articles for different blog applications. It also has all the typital authentication functionalities for users with Jason Web Token (JWT). It was developped with Node.js, Exprees, and Mongo DB. In the link you can see the documentation of the API. The real API is hosted in a different location.

### www.arteludovica.com.ar

Website dedicated to the history of the Arteludovica Theater Company. Developed using HTML, CSS and JS.

### traduccionesliterarias.com

Website dedicated to the publication and offering of literary translation services. Developed using HTML, CSS, and JS. I utilized Bootstrap as a framework for the styles.

## KNOWLEDGE
